

January 16, 1958

Dr. Henry C. Isliker
University Laboratory of Physical Chemistry
Harvard University
Boston, Massachusetts

Dear Dr. Isliker:

I read your article in the Ann. New York Academy of Sciences, 57, (1953) with great interest, and can visualize some useful applications in my own work in microbial genetics.

If you could furnish a reprint of that article, and citations to (or even better copies of) your later work on this subject, I would be most grateful.

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics
